

Hair Extension Maintenance Contract

Client's Name _____ Date of Service _____

Initial each Instruction

___1 - Do not shampoo for 24 hours. Always wash your hair with your head up or back like in a shower and not tilted forward. Never put conditioner on your bonds, keep 3" away from scalp. Never dry with a scrubbing action, instead wrap with a towel to absorb water. Always dry bonds to prevent breakdown. If your hair takes longer than 1 hour to dry on its own blow dry the bonds. Never put hair up when wet. Bonds will stay wet all day which will make them shed.

___2 - Run your fingers between your bonds every day to keep extensions from tangling together. It is very important to be gentle with your hair extensions. They are attached to small amounts of your own hair. While hair extensions themselves will not harm your hair, rough handling of them will pull your hair and may cause damage. When brushing hold the hair up by the roots to prevent pulling.

___3 - Your stylist will recommend how often you should brush, a loop brush or specialty extension brush is best. Start in the nape and work your way up. Never go to bed with wet hair. If you sleep restlessly or you have very fine hair in the front it is recommended that you sleep with a soft head band on. This protects your delicate front hair. Always pull extensions into a covered hair tie or braid while sleeping to prevent tangling and pulling. A satin pillowcase is recommended.

___4 - Make a follow-up appointment for 4-6 weeks after your initial service. Notify stylist/salon immediately if you have any problems such as tangling or excessive loss of extension hair.

___5 - Curling irons, flat irons and hot rollers may be used, but must be kept an adequate distance from the bonds. Daily curling/straightening with hot tools will damage the hair. Keeping temperature below 325 degrees helps but not using hot tools is the best. Heat protectants only help a little bit at high temperatures.

___6 - Activities taking place in a constant, damp environment such as aerobics, steam baths or saunas may lessen the longevity of K-tip extensions. Dry your bonds as soon as possible after any of these activities.

___7 - I have received a copy of the "Hair Extension Care Guide" and I understand it.

___8 - Seawater and pools can cause damage and tangling. To minimize these effects, wet hair completely in a shower and apply a conditioner to the ends. After swimming, shampoo and blow-dry the bonds to prevent bond breakdown.

___9 - Some extension loss and shedding is normal and to be expected. It is normal to lose 1-4 extensions a month. Average client hair loss is 50-150 hairs a day. A full head application covers approximately one third of the head. You can expect to see a small quantity of naturally released hairs trapped in the attachments after some time. This is normal and should not be interpreted as hairs pulled of the scalp by the extensions themselves. Daily brushing close to the scalp and finger separation of the applied strands will avoid matting in this area.

___10 - There are no refunds on hair extension applications. Deposits are not be refundable, each hair extension application is different. Please discuss any issues with your hair extensionist.

I have read, initialed and understood my home care maintenance sheet. If I do not follow the above in-structions I understand _____ cannot be held responsible.
